

# Tank Compliance For Non-Retailers

**Even if selling gas isn't your business...**

**If you store fuel in a UST, staying on top of the regulations and protecting your assets needs to be.**

Storing and dispensing fuel may not be how your business makes money, but it can be a very quick way to lose a whole lot of it.

Federal, state and local environmental regulations are no less applicable to non-retail fuel facilities – and they continue to get more stringent all the time.

Are you confident that your facility is up-to-date with the latest regulations and that your compliance program is adequately protecting you from a costly leak of fuel?

Tanknology® is the largest company in the United States devoted to the testing and related compliance services for fuel tank systems, with extensive experience in the complexities of non-retail fueling facilities. We have all the experience and capabilities necessary to help you efficiently and cost-effectively manage the multifaceted regulatory and safety requirements of your site.

**We can help you manage complex environmental regulations at non-retail fueling sites. Here is a list of just some of our services:**

- *Underground Tank, Line & Leak Detection Testing*
- *Monitoring System Certifications, Repairs & Installations*
- *SB989 Containment Testing & Repairs*
- *Stage II Vapor Recovery Testing & Training*
- *CA Designated Operator Training & Monthly Inspections*
- *Tank Site Assessments*
- *Above Ground Store Tank (AST) Inspection & Testing*
- *And much, much more...*

**Whether you desire a turn-key compliance solution for your facility or help with a single environmental regulatory issue, give us a call at 1-800-964-1250.**

*Environmental Compliance for Petroleum Systems*
