

# Tanknology® Services for Consulting Engineers

At Tanknology, we provide compliance-related services at more tank facilities than any company in the world.

We regularly partner with Environmental Engineering Consultants, bringing our tank site expertise and compliance services to a project in support of a consultant and their client.

The key word is partner. We fully understand that you are our client and that the ultimate client is your client. So we work hand-in-hand with you — on the scope-of-work, pricing, scheduling and service delivery. All of it approached with the objective of meeting yours — and your client's — expectations.

## Services we regularly provide to consulting firms include:

- STI 0001 AST Inspections
- UST site inspections
- Tank and line testing in conjunction with acquisition or divesture programs
- SBA Loan inspections and testing
- Corrosion protection surveys and installations
- Petroleum tank cleaning and/or fuel filtration services
- Operator training (Class A/B/C)
- Site compliance upgrades
- And much more...

If you have a site project involving petroleum or chemical tank facility compliance – call us. You can trust that we will be there, working shoulder-to-shoulder with you, to fulfill your client's needs.

**To learn more, or to discuss specific compliance needs for your site, call us today at 1-800-964-1250.**
