

International Licensing Program

Become a Tanknology® Exclusive Licensee in your Country

With more than 20 years of experience, Tanknology is the largest provider of UST compliance solutions in the world, with crews providing testing and related services at more than 50,000 sites each year. Our patented testing technologies and highly trained technicians provide UST operators with precise, reliable environmental protection.

Worldwide Operations

Tanknology operates internationally through a network of licensees that service major oil companies and large retailers. Customers include Exxon, Shell, Chevron-Exxon, 7-Eleven, BP, Agip, Cosmo Oil, Petrobras, Repsol-YPF, and many more.

Currently the company has 22 licensee partners providing service in more than 27 countries, including Italy, Portugal, Turkey, the United Kingdom, Canada, Japan, Australia, South Africa, Brazil, several Central American countries, and more.

International Licensing Program

Having tested more than 1 million USTs worldwide, Tanknology's technological leadership is unmatched. The company holds 22 patents on UST compliance testing equipment and has obtained all requisite US certifications and numerous international certifications. As a result, our testing technology is recognized as 'The Standard' by major oil companies around the world. Tanknology provides our licensees with all the tools necessary for success in their markets, including our proprietary equipment, training and certification programs, ongoing technical support, quality control, internet-based test data and report processing capabilities, and an exclusive geographic territory.

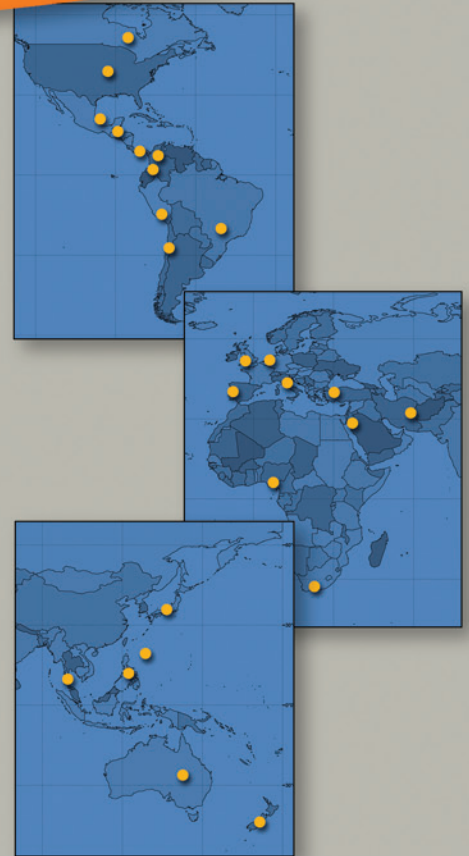

Successful Partnerships

Tanknology's international licensee partners create successful, market-leading positions in their countries by delivering superior services, technological expertise and overall value to UST operators.
