

Site Compliance Testing + Pollution Liability Insurance = Big Savings on Both!

Two National Leaders of the UST Industry Create a Unique Program Combining Risk Reduction and Liability Transfer.

A new Tanknology program, which has been created in collaboration with Berkley Environmental, makes it easier and more affordable than ever to achieve UST compliance and pollution liability insurance for UST sites.

A Package for Everyone

Three different packages have been designed to meet the increasingly stringent Federal and State environmental regulations. In addition to the services offered in each package, you will also be eligible for considerable program discounts on additional compliance services.

Silver

The Silver package typically consists of precision line tests, functionality testing of line leak detectors, Stage I or II air quality tests, enrollment in Tanknology's Online Class C Operator Training program and access to Tanknology's WRAP program at no additional cost.

Gold

A comprehensive site evaluation plus vacuum testing of all spill and over-fill containment buckets is added to all the benefits of the Silver package for Gold level customers.

Platinum

The premier Platinum package includes all the benefits of the Silver and Gold levels, plus a certified functionality test and calibration of the Automatic Tank Gauge (ATG) system, including the console, all probes and sensors.

Your Compliance and Insurance Documents in One Place, Available 24/7

A significant advantage of this new program is the use of Tanknology's WRAP (Web Reporting Access Program), which is an online data warehouse of all your compliance test results. Members of this program will also have access to insurance certificates via the WRAP system – providing you the ability to review, print and share all your important compliance and insurance documents anytime, anywhere.

To Learn More About Utilizing This Unique Program at Your Sites, Call Tanknology at 1-800-964-1250

Benefits at a Glance

Reduced Pricing on Both...

- Tanknology's full range of UST compliance testing and services
- Berkley's A+ Rated pollution liability insurance

Personalized Compliance Scoping and Tracking

A Tanknology compliance specialist will assist you in determining the specific testing requirements for your site, track your compliance dates, and help you stay ahead of critical deadlines – minimizing the risk of costly shutdowns or fines from NOVs.

Online Access to Your Critical Documents

24/7 access to Tanknology's WRAP system for your compliance and insurance documents when and where you need them.

The Most Experienced Professionals in UST Compliance

Our testing professionals have the most extensive experience and training in the UST business. We get in, get your testing done, and get out. Safely and efficiently. We understand how downtime means money.

The Benefits of This Collaborative Program For Berkley Environmental Customers

- Discounts up to 25% off the combined annual cost of UST liability insurance and compliance related testing.
- Silver, Gold, and Platinum packages available – customers can choose their level of compliance testing, with maximum discounts available at the Platinum level.
- Berkley customers can access their test reports online 24/7 via Tanknology's WRAP system. Tanknology will also upload insurance certifications into the WRAP system at no additional cost – an arrangement not available anywhere else!

Who is Tanknology?

- Tanknology is America's largest provider of UST compliance solutions, serving more than 50,000 sites each year, for operators of all sizes, in every corner of the country.
- Tanknology's locally-based UST site experts provide the broadest array of UST compliance-related services and proprietary testing technologies of any company, anywhere.

How does the program work?

- Berkley agents can refer customers and prospects who are going through the underwriting or renewal process to call a Tanknology representative at 1-800-964-1250. The Tanknology rep will explain the available packages, as well as any local or state-specific regulatory requirements applicable to their sites. The rep will also outline all available discounts on Tanknology services available through this program.
- When customers place an order with Tanknology, they will be asked to authorize Berkley to access their accounts on the Tanknology WRAP system. This will facilitate Berkley's direct access to test reports, expediting the underwriting process.
- Once test reports are uploaded to Tanknology's WRAP system, Berkley will complete the underwriting process and issue the policy, including all applicable discounts, based upon the package selected by the customer.

What's in it for you?

- You can now present your customers with top quality insurance products, coupled with site protection from the biggest and most trusted name in the UST compliance industry – all at discounted rates not available anywhere else.
