Tanknology Launches Newly Redesigned Website

Austin, TX — Tanknology Inc., the world's largest provider of environmental compliance testing and inspection services, announced today the launch of its revamped website. The newly redesigned website offers quick and easy access to essential information and features that offer a more comprehensive understanding of the Tanknology innovative testing and compliance offerings. The website also has a comprehensive international section with updated news and events, service and compliance information.

The new website has a clean, uncluttered design, improved functionality and enhanced content focused on Tanknology's mission to be an affordable and accountable compliance partner for our clients. The new website went live on Monday, March 19, 2018 and is located at www.Tanknology.com.

"We are excited about our new website launch and the robust information it provides for customers, partners and media to better understand Tanknology's industry-best testing and compliance services," said Allen Porter, President and CEO of Tanknology. "We believe that the rebuilt and reorganized site will allow our visitors to have a very informative experience as we continue to grow."

The website launch coincides with the celebration of Tanknology's 30th Anniversary and is branded with the company's new 30-year logo. Founded in 1988, Tanknology was a business created in response to 40 CFR 280, a government regulation that established the first federal minimum standards governing underground storage tanks and piping. Since its founding, Tanknology has grown to become the world's largest petroleum tank testing company, operating in all 50 states. Tanknology currently employs more than 300 and holds 22 patents on forecourt testing equipment. The company has 23 international licensee partners operating proprietary technology in more than 30 countries.

The new Tanknology website will be updated on a regular basis with news of product launches, business activity, corporate milestones and events.

About Tanknology

Based in Austin, TX, Tanknology operates across America and around the world, providing environmental compliance testing and inspection services at more than 50,000 petroleum fueling and storage facilities per year, offering more than 20 compliance-related service offerings. Internationally, Tanknology licensees span more than 30 countries, providing services to the largest petroleum operators in the world.
