**Tanknology announces approval to conduct line testing  
In Suffolk and Nassau Counties of New York (Long Island)**

**Austin, TX** – Tanknology Inc, the nation’s largest provider of environmental compliance services for petroleum systems, announced today that it has received the necessary regulatory approvals to conduct line testing at fueling facilities in the Suffolk and Nassau Counties of Long Island, New York.

According to Allen Porter, President of Tanknology, the required technician certifications were recently completed, allowing the company to begin the testing of fuel lines at stations throughout the two counties.

“Suffolk and Nassau Counties have very diligent environmental requirements and mandate comprehensive testing and certification of technicians in order to certify them to conduct tests in their jurisdictions,” Porter said. “We are pleased to now be in a position to perform these required annual tests for customers throughout the area.”

For information about line testing, or Tanknology's full range of environmental compliance services, New York area customers can contact Tanknology's Eastern Regional Office at 1-800-666-2605.

Based in Austin, Texas, Tanknology has 10 regional offices covering all areas of the United States, in addition to international licensees throughout the world, providing UST environmental compliance testing and related services at more than 39,000 sites per year, for more than 3,000 customers. Internationally, Tanknology licensees span more than 20 countries, providing services to the largest petroleum retailers in the world.

For more information about Tanknology's services world-wide, call Tanknology at 1-800-800-4633, ext. 228 or visit Tanknology on the web at [www.tanknology.com](http://www.tanknology.com).
